The Cycle of Market Emotions

CALL FOR SUBMISSIONS

THEME: MAPPING

Building Material, the journal of the Architectural Association of Ireland, is seeking submissions for an image-based project to appear online, in advance of the next issue on the theme of mapping.

The project seeks to explore mapping as a means of analysing and understanding the effects of our current position in the economic cycle on architecture and the built environment.

We are looking for submissions from all disciplines including anthropologists, archaeologists, artists, cartographers, geographers, illustrators, sociologists, scientists, surveyors... and architects.

All images are to be a minimum of 300 PPI. The deadline is Monday the 28th of February. This project will go online in March 2011. Building Material is the journal of the Architecture Association of Ireland.

If you are interested in contributing to this online project please contact: buildingmaterialeditor@gmail.com
